TURN KEY HEALTH

INVESTIGATIVE REVIEWS/WITNESS STATEMENTS:

OCDC investigated and found "nothing relevant."
witness statements reviewed.

MEDICAL EXAMINER FINDINGS:

pending but autopsy
did find ruptured splenic artery.

SUMMARY OF FINDINGS:

Pt. was known to be detoxing
from heroin and was being appropriately
tx for this per protocol. She had not
reported any rectal bleeding, melena or
hematemesis, or abdominal pain.

AREAS OF CONSIDERATION:

Case will be discussed to
security & medical staff. Appropriate
training & education regarding detox
will be continued.
